

HELLO FROM TABLEE

Designed by fellow servers, Tablee is here to make your life easier (and your wallet fatter). When a guest needs service, you'll simply receive an alert on your Tablee smart watch. No more rude or awkward attempts to flag you down. Can you say hallelujah? But really that is just the start...

- ✓ Make more money. Servers earn **\$10K more per year** with Tablee, on average! How? Tablee makes re-ordering easy. And the more they order, the more you take home.
- ✓ Collect points as you respond to guests' requests and redeem them for goodies.
- ✓ Get money for your education. You're now eligible for our Tablee scholarship program!

COMING SOON

LET'S GET STARTED

01 DOWNLOAD THE TABLEE APP

- Login with your personal username and password. Please see your manager for the account details.
- When logged in for the first time, click yes for “Allow Push Notifications for Tablee App”. This step cannot be skipped because push notifications enable the watch to read info.

02 PAIR A TABLEE WATCH WITH YOUR PHONE

- Pick a watch you'd like to pair with your phone.
- Navigate to the settings screen in the Tablee app. You'll see a list of Tablee watches available nearby.
- Select the watch that matches the 4-digit code on the watch you'd like to pair with. A pop-up notification titled 'Bluetooth Pairing Request' will appear. **Make sure to click Pair to finish the process.**
- Unpair your watch at the end of each shift by navigating to Phone settings → Bluetooth → Tablee → Forget this device.

WATCH TIPS:

- Make sure push notifications are turned on (see Step 1)
- To charge watch: Find arrow pointing to the USB on the back of the watch and pull the band apart. You can use any USB charging port—just be sure to insert the USB port with metal contact side touching metal charging station.
- To reset the watch: click the phone it's paired with.
- To receive notifications properly, watch and phone should be kept close to each other. We recommend keeping the phone in a pocket or apron.
- Lastly, you can request your own Tablee watch at help@tableeco.com

QUICK TIP: *To introduce Tablee, we recommend saying something like... “I will be checking on you regularly. But in case you don't see me when you need me, just ding me with Tablee and I'll be right over!” The more the customer is aware, the more they'll order.*
